So this mirroring is not suitable for gaming However, it is very suitable for watching movies, giving presentations, watching photos, and much more! The quality of your experience will be dependent on the quality of your local network.. If your router supports AC and N, also make sure that your router is set to use either the Wifi N or Wifi AC networking.. This resets your router and will make your home network faster and more stable Why this works? Routers are in essence little computers, with software.

4Ghz, because that will negatively impact the performance of screen mirroring Use an AC or N router.. Mirror for Roku TV 2 4 2 Application to mirror the screen and audio of your Mac to a Roku Streaming Player, Roku Streaming Stick or Roku TV.. Newer routers support Wifi AC and N Older routers might only have Wifi B and/or G.. B and G are not really up to scratch anymore for modern networking tasks, so go for an AC or N router.. That's why it is a good idea to reset your router once in a while Our recommendation: once a week. [Directsound Driver Download Gratis](#)
